YEAR-END REPORT 2022

THE FULL YEAR

- Net revenue totalled SEK 3,509 million (3,151)
- Operating profit amounted to SEK 341 million (453)
- Profit before tax amounted to SEK 309 million (433)
- Profit after tax amounted to SEK 249 million (342)
- Earnings per share were SEK 4.30 (5.90)
- Proposed dividend per share SEK 1.75 (1.75)

Important events during the year

- Extended credit facilities
- 2:1 share split implemented

THE FOURTH QUARTER

- Net revenue totalled SEK 806 million (883)
- Operating profit amounted to SEK 34 million (114)
- Profit before tax amounted to SEK 19 million (107)
- Profit after tax amounted to SEK 23 million (88)
- Earnings per share were SEK 0.40 (1.51)

SUMMARY OF THE 2022 FINANCIAL YEAR

Net revenue, SEK m	3,509	(3,151)
Net profit for the period, SEK m	249	(342)
Earnings per share, SEK	4.30	(5.90)
Profit margin, %	8.8	(13.8)

CEO'S COMMENTS ON THE GROUP'S DEVELOPMENT DURING THE PERIOD

THE GROUP

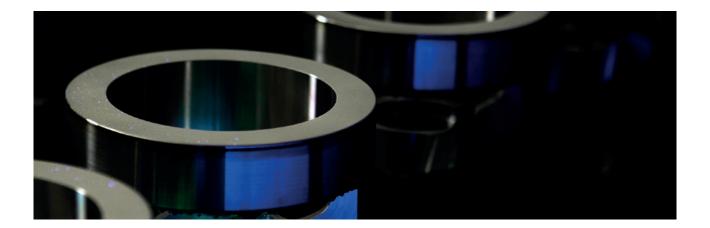

After a generally strong start, most of our operations were increasingly impeded by difficult external factors over the past year. We still exceeded our long-term financial objectives for the year as a whole, but the Group reported a deterioration in operating profit of approximately 25 per cent compared to the previous year. The operating margin was 9.7 per cent (14.4) and the profit margin amounted to 8.8 per cent (13.8). Sales increased by 11 per cent, of which 2 per cent was organic growth.

The end of the year followed the trend from the preceding period and the consolidated results during the fourth quarter were weak. Relative to the comparison period, sales declined by almost 9 per cent, while the operating margin fell from 12.9 to 4.2 per cent. This negative trend mostly affected the majority of the operations in the Industrial Solutions business unit. Here, the relatively weak incoming orders during the second half of the year, along with the effects of delayed project deliveries, had a significant impact during the period. Continued disruptions in both our own and our customers' supply chains meant that many ongoing automation projects were paused and the start-up of new projects was postponed. Within all our business units, however, some operational areas have not been particularly affected by external circumstances, and consequently have seen a more favourable development.

If we look at the Group as a whole, there are two main factors that have affected profitability. The first relates to deteriorations in productivity as a result of constantly having to adapt the production process in line with new preconditions, combined with periodic high sickness absence. The second is that we have not managed to compensate sufficiently for the cost increases we have been affected by. Far-reaching measures are being implemented in the form of cost savings and price rises, as well as to safeguard critical processes in the supply chain. These are being combined with aggressive initiatives in respect of marketing activities, for which resources are continually being allocated.

THE INDUSTRIAL PRODUCTS BUSINESS UNIT

Sales increased by 29 per cent compared to the previous year, of which 17 per cent was achieved through acquisitions. Operating profit fell by 10 per cent.

Within the business unit, there were major differences between the companies in terms of outcome, with many of the companies reporting stable profits. One contributory factor is the positive trend as regards the proprietary product ranges within infrastructure and industry. The most significant negative effect was experienced by our businesses that have a high proportion of their production linked to the automotive sector. Here, the shortage of input goods at our customers both reduced order volumes and delayed the placing of orders. Within the automotive segment, it has also been difficult to implement price adjustments, and there is a considerable lag as regards promised compensation. Outside of the automotive segment, the market situation is generally good, and more resources have been allocated to marketing activities including the introduction of our own products on new markets.

THE INDUSTRIAL SOLUTIONS BUSINESS UNIT

Sales increased by 12 per cent compared to the previous year, of which 8 per cent was achieved through acquisitions. Operating profit fell by 17 per cent.

Successful project sales during the previous year resulted in relatively stable margins during the first nine months of the year. However, the final quarter was impacted to a great extent by the effects of the lower incoming orders and the disruptions in the supply chain experienced during the second half of the year. In practice, this has resulted in both ongoing automation projects and major deals in the start-up phase being postponed. Orders have also not been realised to the anticipated extent, and our organisations that have geared up for growth have had to adjust and gear down. However, we have seen positive results from our investments in new business areas and on new geographic markets. More in-depth collaboration with our customers through extended after-sales services has also opened the door to new opportunities.

THE PRECISION TECHNOLOGY BUSINESS UNIT

Sales fell by 12 per cent and operating profit decreased by 51 per cent compared to the previous year.

Taking the current global situation in consideration, it was already before-hand looking difficult to match the previous year's strong results, but the business unit's combined performance over the past year was still below our own expectations. Developments during the final quarter followed the trend from previous periods, with a generally more cautious market. Within the medical technology sector, which is the dominant sector for the business unit, customers continually revised their purchase volumes downwards. With the high degree of unpredictability, it has not been possible to utilise the resources satisfactorily, and the lower productivity levels have hit profitability hard. In addition to this, our companies have not been able to compensate for increased costs with corresponding price rises. The organisations have continued to adapt to the lower volumes. At the same time, aggressive initiatives are being implemented on the marketing side in an attempt to seek out new niches and customer segments.

FUTURE DEVELOPMENT

The market situation is expected to remain cautious in the immediate future, although we are witnessing a certain levelling out of the downward trend and a more balanced influx of orders. Raw material prices have stabilised, although general cost increases are continuing to have a dampening effect on our business. During the present quarter, we will be seeing the effects of implemented price adjustments and the gradual adaptation of our workforce to the lower incoming order levels. Cash flow and margins are the focus of our agenda. Our order situation is good, but the shortage of critical components is a concern, particular in respect of our project-related operations. Work aimed at identifying alternative supply routes is therefore being prioritised, alongside investments in aftersales services. Through one of our more recent acquisitions, we have also extended our offering in respect of software solutions, an area where we can see considerable potential for growth. We are consequently maintaining our aggressive approach and have great faith in the future.

When it comes to acquisitions, we have consciously adopted a more cautious approach for a period of time, but, backed by our extended credit facilities, we have good potential to supplement our operations in future.

Lennart Persson

President and CEO

GROUP OVERVIEW

The XANO Group is made up of engineering companies that offer manufacturing and development services for industrial products and automation equipment. The Group is represented in the Nordic region, Estonia, the Netherlands, Poland, China and the USA. The operations are divided up into the Industrial Products, Industrial Solutions and Precision Technology business units.

INDUSTRIAL PRODUCTS INDUSTRIAL SOLUTIONS PRECISION TECHNOLOGY 26% 23% Net sales Operating profit Net sales Operating profit Net sales Operating profit

INDUSTRIAL PRODUCTS

Q1–Q4 2022 vs Q1–Q4 2021: Sales rose by 29 per cent, of which 17 per cent related to business combinations. Operating profit decreased by 10 per cent.

Operations within the Precision Technology business unit cover component and system manufacture using advanced cutting processes, laser welding and 3D printing for the production of parts involving demanding quality and precision requirements.

FINANCIAL DISCLOSURES AND OTHER INFORMATION

GENERAL INFORMATION

All amounts are reported in millions of Swedish kronor and relate to the Group, unless otherwise indicated. Amounts in brackets refer to the corresponding period last year.

REVENUE AND PROFIT

The fourth quarter

Net revenue totalled SEK 806 million (883). Operating profit amounted to SEK 34 million (114), corresponding to an operating margin of 4.2 per cent (12.9). Profit before tax was SEK 19 million (107).

The full year

Net revenue totalled SEK 3,509 million (3,151). Operating profit amounted to SEK 341 million (453), corresponding to an operating margin of 9.7 per cent (14.4). Profit before tax was SEK 309 million (433). Profit includes non-recurring items totalling SEK 1 million (8), see also Note 2.

SHARE DATA AND KEY FIGURES

The full year

Basic earnings per share were SEK 4.30 (5.90). Equity per share was SEK 26.39 (23.13). The average number of outstanding shares was 57,985,082. The equity/assets ratio was 42 per cent (38) at year-end. The average number of employees was 1,426 (1,245).

IMPORTANT EVENTS DURING THE PERIOD

The Coronavirus pandemic has continued to have only limited negative consequences for the Group. However, higher levels of sickness absence and disruptions in the supply of materials have affected the delivery capacity to a greater extent than before.

As regards the conflict in Ukraine, XANO does not conduct any operations either there or in Russia. The few projects related to customers in the area in question that was ongoing, have been terminated. As a consequence of the conflict, however, already difficult external factors such as price increases and the lack of access to input goods are being accentuated, which is affecting the Group's companies to varying degrees.

The Group's total credit facilities have been expanded, through new agreements, by the equivalent of SEK 820 million to a total of around SEK 2,200 million. As a result, the financing of XANO's continued growth and acquisition-related work has been secured. A new agreement was entered into with Nordea Bank on 3 June 2022 regarding a credit facility of SEK 1,700 million, which is an increase of SEK 320 million from the previous level. This agreement will run for three years, with the option of extending for a

further one plus one years. A credit agreement was also entered into with the Swedish Export Credit Corporation in June regarding a new facility of around SEK 500 million with a corresponding duration.

Following a resolution at the Annual General Meeting, a 2:1 split of the Parent Company's shares was implemented in June.

EVENTS AFTER THE END OF THE PERIOD

There are no individual events of major significance to report after the closing day.

INVESTMENTS

The fourth quarter

Net investments in non-current assets came to SEK 47 million (119), of which SEK 2 million related to intangible assets, SEK 19 million to real estate, SEK 21 million to machinery and equipment and SEK 5 million to right-of-use assets.

The full year

Net investments in non-current assets came to SEK 144 million (598), of which SEK 4 million related to intangible assets, SEK 45 million to real estate, SEK 90 million to machinery and equipment and SEK 5 million to right-of-use assets.

CASH FLOW AND LIQUIDITY

The full year

Cash flow from operating activities amounted to SEK 128 million (353). Higher operating capital, primarily in the form of increased contract assets and reduced advance payments, along with a lower profit level, have contributed to the weaker cash flow in relation to the comparison period.

Liquid assets, including lines of credit granted but not utilised, totalled SEK 1,363 million (740) on the closing day.

NUMBER OF SHARES AND VOTES

At the Annual General Meeting on 12 May 2022, it was decided to increase the number of shares by splitting each existing share into two new shares of the same type (2:1 split). The split was carried out and registered in June, with 15 June as the record date.

After the share split, the total number of shares stands at 58,494,214, divided between 14,577,600 class A shares and 43,916,614 class B shares, with a nominal value of SEK 0.625. Each class A share entitles ten votes and each class B share entitles one vote. The total number of votes amounts to 189,692,614. The company holds 509,132 of its own class B shares. The share capital remains unchanged at SEK 36,558,884.

RISKS AND UNCERTAINTY FACTORS

The Group's main risks and uncertainty factors include operational risks associated with customers and suppliers and other external factors such as price risks for input goods. In addition, there are financial risks as a result of changes in exchange rates and interest rate levels.

The Group's operations span many different sectors and customer segments, which generally entails a good spreading of risk. We also enjoy a high level of preparedness to make adjustments. The ongoing Coronavirus pandemic is a risk and uncertainty factor that could have significant consequences for the Group's operations. The health and safety of our employees is our top priority, and we are complying with the guidelines and recommendations issued by the public authorities in the countries where we operate. This may in itself entail restrictions to our ability to carry out installations and maintain services for our customers. At the same time, the extent of our customers' need for products and services may be significantly reduced. There are also risks associated with e.g. material supplies and the purchase of services and transports, which have increased as a result of the ongoing conflict in Ukraine. The sanctions that are being introduced against Russia as a result of the invasion, as well as any countermeasures, may affect parts of our operation, for example in the form of a lack of access to energy. The willingness to invest on the part of some of the Group's major customers is also closely linked to the development of the global economy.

A statement on the Group's other main financial and operational risks can be found on pages 83–84 of the annual report for 2021.

RELATED PARTY TRANSACTIONS

During the year, no transactions have been conducted between XANO and related parties that have significantly affected the Group's financial performance and position.

PROPOSED DIVIDEND

The Board of Directors proposes that the Annual General Meeting allocates a dividend of SEK 1.75 (1.75) per share, totalling SEK 101.5 million (101.5) based on the current number of outstanding shares. The dividend amount per share in respect of the previous year has been recalculated as a result of the implemented share split. It is proposed that the dividend be paid in two instalments, SEK 1.00 in May and SEK 0.75 in November.

The proposed dividend represents approx. 41 per cent (30) of net profit for the period.

AUTHORISATION FOR REPURCHASE OF OWN SHARES

The Board of Directors proposes that the Annual General Meeting renew the Board's authorisation to decide on the repurchase of the company's own shares. Such a mandate would authorise the Board to make decisions regarding the repurchase of the company's shares during the period until the next Annual General Meeting.

Any such repurchase could be effected both via the stock market and by offers to the shareholders. The proposal is that the mandate to the Board should also include the scope for assigning repurchased shares within the constraints of relevant legislation.

AUTHORISATION FOR A NEW SHARE ISSUE

The Board of Directors proposes that the Annual General Meeting renew the Board's authorisation to decide on a new issue of Class B shares corresponding to a maximum of one tenth of the company's issued shares. Such a mandate would entail the Board being able to make a decision on a new share issue during the period until the next Annual General Meeting.

The terms of the issue, including the issue price, must be based on a market assessment in which the issue price in each case is set as close to the market value as possible, less the discount which may be necessary to generate interest in the subscription.

ANNUAL GENERAL MEETING 2023

The upcoming AGM will take place in Jönköping on Thursday 11 May 2023.

At the AGM on 12 May 2022, a Nomination Committee consisting of Ulf Hedlundh (Chairman), Stig-Olof Simonsson and Anna Benjamin was appointed. The task of this committee prior to the 2023 AGM is to nominate a Chairman of the Board and other Board members, auditors, a Chairman for the AGM and to propose fees for the Board and auditors. Shareholders wishing to have an issue dealt with at the AGM must have submitted such a request in writing to the company no later than 23 March 2023 in order for the issue to be included in the notice. The request must be sent to the company at the address: XANO Industri AB, Att.

AGM 2023, Industrigatan 14 B, SE-553 02 Jönköping, or by email to ir@xano.se with "AGM 2023" as the subject.

The annual report for 2022 (in Swedish) will be available in week 15, as a printed version from the head office and in digital format on the website www.xano.se. The annual report is distributed to those shareholders who have actively notified the company that they wish to receive a copy.

NEXT REPORT DATE

The interim report for the period 1 January to 31 March 2023 will be presented on Tuesday 2 May 2023. It was previously announced that the report would be presented on 4 May.

The undersigned declare that the year-end report provides an accurate summary of the Parent Company's and the Group's activities, position and results. It also describes significant risks and uncertainty factors faced by the Parent Company and the companies that form the Group.

NOTES, GROUP

NOTE 1

ACCOUNTING POLICIES

This interim report has been prepared in accordance with IAS 34 Interim Financial Reporting and applicable regulations of the Swedish Annual Accounts Act. The Group and the Parent Company apply the same accounting policies as described in the annual report for 2021 with the exceptions of new or revised standards, interpretations and improvements, which are applied as from 1 January 2022. The critical assessments and the sources of estimates when preparing this interim report are the same as in the most recent annual report.

NOTE 2 OTHER OPERATING INCOME

The amounts reported for the full year include non-recurring items of SEK 1 million (8) in respect of the payment of funds for collective AGS insurance via Fora. This payment is based on previous repayments of AGS premiums for the period 2004-2008.

NOTE 3 NET REVENUE AND PROFIT/LOSS BEFORE TAX

Net revenue refers to revenue from contracts with customers. The information on segments is provided from the management's perspective, which means that reporting corresponds to the way in which the information is presented internally. The Group reports on the following segments: Industrial Products, Industrial Solutions and Precision Technology. The operations within each segment are described on page 4. The segments are reported in accordance with the same accounting policies as the Group. Market conditions are applied to transactions between the segments.

¹⁾ The segment figures refer to the profit/loss before the distribution of group-wide costs and tax in accordance with internal reporting. Undistributed items mainly refer to the Parent Company.

NOTE 4

TAX

Tax amounts to 19 per cent (21) for the full year. Non-taxable items, primarily attributable to currency hedging, are contributing to the deviating tax rate.

NOTE 5

OTHER COMPREHENSIVE INCOME

Change in hedging reserve including tax refers to the effective component of the change in value of derivative instruments used for hedge accounting. Translation differences refer to the effects of changes in exchange rates when net investments in non-Swedish subsidiaries are translated to SEK. The amount is reported net of hedging contracts.

¹⁾ All comparison figures have been recalculated due to the 2:1 share split carried out in June 2022.

A 2:1 share split was carried out in June 2022. After the share split, the total number of shares stands at 58,494,214, divided between 14,577,600 Class A shares and 43,916,614 Class B shares. After deduction for the company's own holding, 509,132 Class B shares, the number of outstanding shares is 57,985,082. The average number of outstanding shares was 57,985,082 during the year. The average number of shares in the company's custody was 509,132 during the year. Each Class A share entitles ten votes and each Class B share entitles one vote. The number of votes, following deductions for the company's own holding, was 189,692,614 on the closing day.

On 1 October 2020, convertibles at a nominal value of SEK 69,998,232 were issued to employees within the XANO Group. The convertibles accrue interest corresponding to STIBOR 3M plus 1.75 percentage points and fall due for payment on 30 September 2023. The conversion rate was originally SEK 122.00. Due to the share split in June 2022, the conversion rate has been recalculated in accordance with section 8B of the terms and conditions. The recalculated conversion rate is SEK 61. During the period 1 September 2023, each convertible may be converted to one Class B share in XANO Industri AB. The nominal value corresponds to 1,147,512 Class B shares. If all convertibles are converted to shares, the dilution will be approx. 1.9 per cent of the share capital and 0.6 per cent of the number of votes based on the total number of shares on the closing day.

NOTE 7 CURRENT RECEIVABLES

Current receivables include interest derivatives measured at fair value of SEK 17 million (–) for the full year. The derivatives are used for hedging purposes and belong to value level 2 under IFRS 13. The fair value measurement is based on a number of factors, including forward interest rates produced on the basis of observable yield curves.

Current receivables include currency derivatives measured at fair value of SEK 4 million (–) for the full year. The derivatives are used for hedging purposes and belong to value level 2 under IFRS 13. The fair value measurement is based on several factors, including observable data such as fixing rates and swap rates for the currency in question.

NOTE 8 CURRENT LIABILITIES

Current liabilities include interest derivatives measured at fair value of SEK – million (6) for the full year. The derivatives are used for hedging purposes and belong to value level 2 under IFRS 13. The fair value measurement is based on a number of factors, including forward interest rates produced on the basis of observable yield curves.

NOTE 9 BUSINESS COMBINATIONS

No business combinations have been performed in 2022.

PiWi Beheer B.V. with subsidiary Case Packing Systems B.V. (CPS) and AV Holding 2018 ApS with subsidiary CIM Industrial Systems A/S are included in the consolidated results from 31 May 2021. Tussenholding Lankamp B.V. with subsidiary PRM Kunststoffen B.V. are included in the consolidated results from 1 November 2021. If the acquired units had been included in the Group throughout the whole of 2021, revenue would have amounted to SEK 3,407 million, while net profit would have been approx. SEK 369 million for the 2021 full year.

²⁾ Constitutes current interest for convertible loan adjusted to market interest rate

DEFINITIONS

AVERAGE NUMBER OF EMPLOYEES

Average number of employees during the period based on working hours. Employees who are covered by short-term work/ temporary layoffs are only included to the extent that relates to actually worked time.

BASIC EARNINGS PER SHARE

Net profit in relation to the average number of outstanding shares.

CAPITAL EMPLOYED

Balance sheet total less non-interest-bearing liabilities.

CASH FLOW FROM OPERATING ACTIVITIES PER SHARE

Cash flow from operating activities in relation to the average number of outstanding shares.

DILUTED EARNINGS PER SHARE

Net profit plus costs relating to convertible loan in relation to the average number of outstanding shares plus the average number of shares added at conversion of outstanding convertibles.

EQUITY PER SHARE

Equity in relation to the number of outstanding shares on the closing day.

EQUITY/ASSETS RATIO

Equity in relation to total capital.

INTEREST COVERAGE RATIO

Profit before tax plus financial expenses in relation to financial expenses.

NET INVESTMENTS

Closing balance less opening balance plus amortisation/ depreciation, impairment costs and translation differences relating to non-current assets.

OPERATING MARGIN

Operating profit in relation to net revenue.

ORGANIC GROWTH

Growth in net revenue generated by the Group's own efforts and in existing structure. The amount has not been adjusted for exchange rate fluctuations.

PROFIT MARGIN

Profit before tax in relation to net revenue.

PROPORTION OF RISK-BEARING CAPITAL

Equity plus deferred tax liabilities in relation to total capital.

RETURN ON CAPITAL EMPLOYED

Profit before tax plus financial expenses in relation to average capital employed.

RETURN ON EQUITY

Net profit in relation to average equity.

RETURN ON TOTAL CAPITAL

Profit before tax plus financial expenses in relation to average total capital.

REVENUE GROWTH

Net revenue for the period in relation to net revenue for a comparative period.

TOTAL CAPITAL

Total equity and liabilities (balance sheet total).

KEY FIGURES

Key figures included in this report derive primarily from the disclosure requirements according to IFRS. Other performance indicators, known as alternative key figures, describe e.g. the profit trend, financial strength and how the Group has invested its capital.

Presented key figures take the nature of the business into account, and are deemed to provide relevant information to shareholders and other stakeholders for assessing the Group's potential to carry out strategic investments, fulfil financial commitments and provide yield for shareholders at the same time as achieving comparability with other companies. The margin measures are also presented internally for each segment.

For reconciliation of key figures, see page 86 in the 2021 annual report.

NOTE 1

Net revenue refers to revenue from contracts with customers. 100 per cent (100) of the Parent Company's net revenue comes from invoicing to subsidiaries.

NOTE 2

Income tax amounts to 18 per cent (21). Non-taxable items, primarily attributable to interest derivatives, are contributing to the deviating tax rate.

The Parent Company, XANO Industri AB (publ) with corporate identity number 556076-2055, is a public limited liability company with its registered office in Jönköping, Sweden.
